Didn't the Government also cause us to have all these "Baby Bell Telephone Company's" by breaking up AT&T. The Quality of services went down and prices went up. My mail now takes two to three times longer to get to me than when a stamp cost .10 cents. And it never got lost back then either. Now they want another price increase for slower, incompetent service. The Government needs butt out of Microsoft's pocket, and business and allow business to flourish. It's good for our economy.
